

ZENO NETWORK (ZNO)

Official Whitepaper v1.0

ZENO NETWORK is a utility-driven blockchain project built on BNB Smart Chain (BEP-20). The project is designed to support digital applications, services, and future blockchain integrations with transparency, simplicity, and long-term sustainability.

1. Introduction

ZENO NETWORK focuses on enabling blockchain-based utility rather than speculative mechanics. It provides a clear, verifiable token structure intended for ecosystem usage.

2. Vision & Mission

Vision: To create a reliable digital ecosystem where blockchain technology enables real applications and services.

Mission: To deliver a transparent and secure utility token that supports long-term ecosystem growth.

3. ZNO Utility Token

ZNO is the native utility token of the ZENO NETWORK ecosystem. It is designed for transactional use, platform integrations, and future digital services. ZNO does not represent equity or ownership.

4. Token Details

Token Name: ZENO NETWORK

Symbol: ZNO

Network: BNB Smart Chain (BEP-20)

Total Supply: 10,000,000,000 ZNO

Decimals: 18

Contract Address: 0x180B860aa47e9280F32D9f949596c0b012Efb198

5. Supply Model

ZNO has a fixed total supply with no minting function. This ensures predictability and protects holders from unexpected inflation.

6. Technology Overview

ZENO NETWORK operates on BNB Smart Chain, benefiting from low fees and fast confirmations. The smart contract follows BEP-20 standards and is publicly verifiable.

7. Transparency & Security

The smart contract is verified on BscScan, allowing public inspection of the code and transactions.

8. Roadmap

Phase 1: Token deployment, contract verification, website and whitepaper launch.

Phase 2: Ecosystem growth, community expansion, integrations.

Phase 3: Advanced utilities and governance tools.

9. Community & Ecosystem

ZENO NETWORK emphasizes organic community growth through transparent communication and long-term development planning.
