ZENO NETWORK (ZNO)
Official Whitepaper

1. Introduction

Zeno Network is a decentralized utility project built on BNB Smart Chain (BEP-20), designed to support applications, games, and digital services with a focus on transparency, security, and long-term usability.

2. Vision

Our vision is to build a sustainable digital ecosystem where blockchain technology is applied to real-world use cases rather than speculation.

3. Technology

• Blockchain: BNB Smart Chain (BEP-20)
• Smart Contract: Verified on BscScan
• Ownership: Permanently renounced
• Infrastructure: Secure, transparent, and immutable

4. ZNO Token Utility

The ZNO token is a utility-based digital asset designed for use within the Zeno Network ecosystem, including access to services, applications, and internal ecosystem interactions.

5. Tokenomics

• Token Name: ZENO NETWORK
• Symbol: ZNO
• Total Supply: 10,000,000,000 ZNO
• Decimals: 18
• Inflation: None

6. Security & Transparency

Zeno Network prioritizes trust through public smart contract verification, ownership renouncement, and complete on-chain transparency.

7. Roadmap (High-Level)

• Phase 1: Project launch and transparency setup
• Phase 2: Community growth and ecosystem planning

• Phase 3: Utility-based application development
